

KR – Records Retention Policy & Schedule

Title:	Records Retention Policy & Schedule
Authorizing Manager(s):	Chief Executive Officer (Blain Heckaman) Chief Financial Officer (Marc Feigelson) Chief Operations Officer (Richard Salinas) Chief Risk Officer (Ivan Garces) Chief Technology Officer (Jerry Rodriguez) Chief Information Security Officer (Vlad Rudnitsky)
Policy Owner:	Chief Operations Officer (Richard Salinas) Chief Risk Officer (Ivan Garces)
Policy Scope:	Firm-wide
Policy Review:	Annually (June and July), and / or upon significant change (as defined by Policy Owner)
Effective Date:	August 12 th , 2024

Version History

Version	Date	Change Description
Draft	01/03/2011	Initial Draft
1.0	01/12/2011	Issued
1.1	18/10/2011	Policy - Mailbox size was changed from 150 Megabytes to 500 Megabytes. Pg 4. Retention Schedule - Seven-year retention period was moved to Eight years. In order to destroy all files (automatic purging) we need to use the created date CaseWare file *ac. To make sure that everything that needs to be destroyed after seven years we need to add the eight-year rule. - Backup Tapes (file server) - Weekly from 1 year to 8 years - Monthly from 2 years 8 years - E&T All fiduciary returns (Forms 1041) and related work-papers for both current and former clients would be kept only 7 years (8 with the new rule) - E&T All not-for-profits (Forms 990) and related work-papers for both current and former clients would be retained for only 7 years (8 with the new rule).
1.2	9/8/2014	Reprinted the PDF fixing the presentation of the tables. No content was created.
1.2	6/1/2017	Last reviewed. No changes
1.3	4/2/2019	- Update RAS retention requirements for banks to be 5 years. RAS banking (validation/risk assessments, lookback) retention requirements to be 5 years - REMOVED KRFS references
1.3	7/20/2022	Policy & Schedule reviewed, no changes.
1.3	7/10/2023	Policy & Schedule reviewed, no changes.
1.3	7/10/2024	Policy & Schedule reviewed by Vlad Rudnitsky, Jorge Rey, no changes.
1.4	8/7/2024	Reviewed by Richard Salinas, Ivan Garces. - New policy owners added – Richard Salinas, Ivan Garces. - Adam Daube replaces Steve Berwick as Records Administrator.
1.4	7/3/2025	Reviewed by Richard Salinas, Adam Daube; no changes.
1.5	9/11/2025	Corrected formatting for Roles & Responsibilities table. Removed highlighting from text.

Purpose

Kaufman Rossin & Co. ("KR") is committed to effective records management to meet its business needs and legal requirements and to efficiently manage, retain and dispose of its records (see "record" defined below). This Records Retention Policy ("Policy") is designed to accomplish these goals and incorporates the Record Retention Schedule (the "Retention Schedule").

This Policy defines the standards to assist all in complying with requirements for handling KR's business records. It is intended to provide guidance for identifying, maintaining, and disposing of company records in a timely and cost-effective manner.

While the Policy describes KR's general records standards and procedures, it does not cover every records management issue or situation. Any questions regarding the application of this Policy should be directed to the Records Administrator (Adam Daube) before maintaining or destroying a record.

Scope

All principals and employees, including temporary or contract employees, are responsible for reading and complying with the Policy and are accountable for the records in their possession and those records over which they have control. This means that all employees are responsible for ensuring that records are identified, retained, stored, protected and subsequently destroyed within their area of assigned responsibility and in accordance with this Policy. The Human Resources Department is responsible for providing every new employee with a copy of the Policy at the time of employment. Part of each employee's job is to implement this Policy.

KR employees are to follow all local and federal laws during the creation, retention, and disposition of company records. Every effort has been made to identify the applicable legal requirements for recordkeeping. However, as all local and federal laws must be followed with regard to creating, retaining, and destroying records, employees and management are accountable for identifying those areas that differ from the instructions in this Policy. Employees working outside of the United States must adhere to the records retention and disposal requirements of both (i) the laws of the jurisdiction in which they are currently working, and (ii) those described in this Policy. If there is a conflict between the provisions of this Policy and the laws of the local jurisdiction with respect to a particular record (see "record" defined below), the record should be retained for the longer of the two periods. Any employee who believes that the retention period governing certain records should be changed or a new item be added to the Retention Schedule should refer such requests to the Records

Administrator (Adam Daube). Final decisions will be made upon consultation with the Records Retention Management Committee and/or their designated legal counsel.

Company management is responsible and accountable for managing and implementing this Policy. Unless another individual has been specifically designated, the head of each department is responsible for managing the Records maintained by his/her department in accordance with this Policy. The Department Head may delegate such responsibility to another person, and such individuals shall be identified in writing to the Records Administrator.

This Policy does not apply to publicly available information such as trade journals, government regulations, books, vendor brochures and catalogues, or any other public information. However, in the interest of space and information management efficiencies, as well as housekeeping considerations, these records should be managed in a cost-efficient manner.

Nothing in this Policy is intended to alter any contractual or legal requirement KR or its employees may have to retain, return or destroy information provided to KR or its employees.

Policy & Standards

1. Definition and Types of Records

As used in this Policy, the term "record" is used in the broadest sense, and shall apply to any and all communications, information, knowledge, event or transaction memorialized, created or received by KR and its employees in conducting company business, regardless of format. All records are the property of KR and are subject to this Policy. This pertains to all record forms and all media, including but not limited to:

- handwritten, typed, or printed documents on paper;
- electronic documents (e.g., e-mail, PDF/Word/Excel documents, instant messages, images and text messages, web sites, diskettes, CD's, etc.);
- audio (including voicemail);
- graphic representations (ex. images), or videos;
- network servers and document/data management systems (including specialized databases).

Types of Records

At KR, we generate and use a broad range of records. Not all records are sufficiently important to retain permanently. Indeed, many records, such as scheduling emails, have a short life cycle value. Therefore, it is KR's general policy to maintain records only for the minimum periods set forth in this Policy and the Retention Schedule, or for longer periods as required for legal or authorized business purposes. Electronic records are to be maintained in a designated centralized server (such as the F: drive). Once this period has expired, the record must be destroyed in accordance with the "Proper Disposition" provision of this policy unless the record falls within the scope of a legal hold or other preservation requirement.

The Retention Schedule provides guidance for categorizing records and assigning a retention period for each. The list of records identified in the Retention Schedule is not intended to be exhaustive. Instead, categories of records and specific examples of records that fall within those categories have been identified to enable employees to determine the applicable retention period. If two or more categories with different retention periods are applicable to a record, the record should be retained for the longest applicable retention period.

There are generally two types of records—"General Business Records" and "Special Records."

General Business Records

All company records are general business records unless identified as a special record. General business records may be kept for a period not to exceed two (2) years after the record creation date, and, in many instances, should be disposed of much sooner. For example, an email scheduling a lunch appointment is a general business record that should be disposed of when it no longer serves any business purpose, and in any event should not be kept longer than one year.

Special Records

Special records have a business, tax, or legal requirement that generally requires retention for more than three years. These records are listed in the Retention Schedule attached to the Policy. Special records must not be destroyed before the prescribed retention period has expired; thereafter, special records shall be destroyed within a reasonable period. Substantive correspondence (whether in paper, electronic or other form) relating to a particular type of special record should be retained for a period equal to the retention period for the correspondence special record.

Drafts and Copies of Records

If an official copy of a special record has been identified, any other copy of that record shall be classified as a general business record. A copy is an exact replica of the original. Prior drafts, revisions, or original documents that have additional handwritten notes are not considered duplicates of the original document. In no instance shall a copy of a record be kept longer than the official record.

Drafts of agreements or documents (whether in electronic or hard copy form) must be disposed of after the finalization of the agreement or document, or after the abandonment of the contemplated transaction.

Persons who receive a copy of a paper or electronic record (such as a "cc" or "bcc") are under no obligation, unless otherwise instructed, to retain correspondence under this Policy if the author(s) or primary recipient(s) is a KR employee subject to this Policy. Persons copied on paper or electronic records where the author(s) or primary recipient(s) are subject to this Policy shall assume that the author(s) or primary recipient(s) will retain the record in accordance with this Policy. If neither the author(s) nor primary recipient(s) is subject to this Policy, then copies of the record shall be retained in accordance with the retention periods specified.

Client Records

By virtue of its varied practice areas, KR handles and generates many kinds of confidential and sensitive client information. In light of this, client electronic files (whether received from a client or generated by KR for a client) are to be maintained in a designated centralized server and folder location (such as the F: drive). Additionally, only work papers and documents supporting the work performed are to be kept (refer to “Drafts and Copies of Records”) at the conclusion of an engagement, barring any other legal requirement. This means that all other duplicates, versions and files that were not used to support work performed on a client file should not be retained.

Temporary files gathered or created outside of KR during the course of an engagement must be transferred to a designated centralized server location upon returning back to the office and should not reside on a computer hard drive or other portable storage media.

Records prepared by client delivered via portable storage media (such as thumb drive, CDs/DVDs) must be transferred to a designated server location. The portable storage media must be returned to the client or erased as soon the records have been transferred, unless, otherwise required to meet the specific needs of the engagement (for example chain of custody for digital forensic matters).

Non-Client Records

Non-client electronic files (whether received from a third party or generated by KR) are to be maintained in a designated centralized server (such as the F: drive). Files should not reside on a computer hard drive or other portable storage media.

2. When to Dispose of a Record

Each employee is directed to periodically review records in their possession or control and dispose of those records that are no longer required under the Policy. Records shall not be retained for longer than the specific retention period or general business record retention period (unless subject to a specific exemption or special condition requiring a longer period) without obtaining authorization from the Records Administrator (refer to “Suspension of Policy/Legal Holds”).

Employees are cautioned that keeping a document “just in case” it may be needed later for some speculative purpose is not a valid reason to suspend the requirements of this Policy.

Proper Disposal

Records should be disposed of according to the level of confidentiality or content of proprietary information as follows:

- Paper records containing no personal, financial, proprietary or otherwise confidential information can be discarded with the regular trash.
- Paper records containing personal, financial or proprietary information (such as social security numbers, credit card numbers, or other personally identifying information) must be shredded, incinerated, or pulped.

- Electronic records (such as emails or other documents) must be deleted in accordance with guidelines supplied by the IT Department to prevent reproduction, duplication, or re-capture from discarded discs, hard drives, or other physical media.
- For electronic records and/or media that contain personal, financial, proprietary or otherwise confidential information, contact the IT Department to obtain assistance for proper disposition of the data.
- In the case of paper records and electronic records maintained or archived off-site, destruction/deletion will be conducted in accordance with procedures as defined in individual contracts with applicable vendors.

Paper Documents

KR has endeavored to operate in a paperless environment. Therefore, barring any superseding legal requirement such as a legal hold, all paper documents are to be created or converted to electronic format with the exception of the following documents:

- original signed engagement letters,
- original signed representation letters, or
- legal confirmations.

Once a document has been electronically scanned the original hard copies must be shredded, incinerated, or pulped. Hard copies printed for review and no longer in use must be shredded, incinerated, or pulped.

3. Electronic Communications

E-mail, voicemail and other electronic communications are to be maintained and disposed of according to this Policy based on the type of record. However, e-mail and other similar communications present a unique records retention issue because such communications may contain attachments. In considering the nature of email, for retention purposes, the email should be considered as a whole, including any attachments.

If the e-mail message:

- with or about client information does not contain pertinent information and contains an attachment. The attachment, if pertinent, should be opened and retained separately to the appropriate client directory on the network.
- with or about client information contains an attachment and has pertinent information, the entire email (including the attachment) should be retained at the client directory on the network.
- with or about client information does not contain pertinent information, the email should not be retained and deleted.
- lacks substantive value or is intended to serve only a short-term goal (i.e. such as scheduling a meeting or SPAM). Email should not be retained and deleted as soon as they have served their intended purpose.

- contains relevant non-client information it can be stored in the mailbox. Due to a limitation in storage space on the Email System it is necessary to limit each person's mailbox size to 500 Megabytes and will be deleted after a year.

If the voicemail message:

- with or about client information and contains pertinent information, the voicemail should not be retained at the client directory on the network but should be followed up with a confirming email from the client or client representative.
- lacks substantive value or is intended to serve only a short-term goal should not be retained and deleted as soon as they have served their intended purpose.
- All voicemails will be deleted from the system after 14 days.

Emails maintained in an individual, or personal, folder within an employee's email account are also subject to this Policy. Employees are reminded to review their email folders, and to delete emails and files in accordance with the Policy. Emails that are not considered a special record maybe kept for a period not to exceed one (1) year and stored in a location managed by the IT Department.

Employees often print emails they wish to retain or save emails on their hard drives or a company file server. Printed emails or emails saved on an individual's hard drive or a file server are subject to the same document retention periods listed in this Policy and the Retention Schedule for the type of document the email represents, regardless of location. Similarly, hard copy materials that are converted and maintained in electronic form should be retained for the same period of time as the original hard copy document. All emails, with pertinent information, related to KR internal operations, an engagement with or about a client should be retained at the client directory and not retained in the mailbox or other storage locations.

Storage of electronic records in electronic form should be on a medium that has been approved by the IT Department.

Document / Systems Backups and Backup Tapes

KR retains backup tapes for disaster recovery purposes only. Back-up tapes must not be relied upon by employees as a tool or method for archiving records that are required to be maintained under this Policy.

Departing Employees/Reassigned Records

All records are the property of KR. Upon retirement/ separation from KR or relocation to a different position within the company, each employee will be requested to return all records to the company. The head of each department will determine disposition of the records by reassigning the records or properly destroying the records according to the records retention described in this Policy and the Retention Schedule. An employee who receives reassigned records must continue to maintain such records in accordance with this Policy.

Suspension of Policy/Legal Holds

When a lawsuit, subpoena or government investigation is reasonably foreseeable, KR is required to suspend its records management policy and to preserve any relevant documents. Examples of such events that may trigger suspension of the Policy include:

- a lawsuit;
- a bankruptcy filing;
- an administrative, regulatory or other government investigation (including EEOC complaints, IRS audits, etc.);
- notice that a party intends to file a lawsuit against KR;
- receipt of a subpoena requiring production of documents;
- reporting a claim to KR's insurance carrier or consulting with legal counsel re: a possible claim or lawsuit;
- a material misstatement in a prior year financial statement; or
- terminated by a client for cause (e.g. alleged errors or deficiencies in professional services).

If management determines that a legal hold is required, then the Records Administrator or assignee will promptly implement a legal hold to notify employees to preserve all relevant records and to take any other reasonable steps to preserve all relevant records. Employees likely to have relevant documents may then be asked to identify those records that must be held pending the resolution of the matter and notify the Records Administrator or designated legal counsel. The IT Department will also assist in implementing the legal hold by taking steps to preserve relevant electronic data and, if appropriate, remove pertinent backup tapes from recycling and suspend any automatic purges.

In some instances, a single record may be subject to more than one legal hold. In this instance, the record shall be preserved until all applicable legal holds have been lifted. Once the legal hold has been lifted, the records revert to their normal retention periods and may be destroyed according to the Policy and the Retention Schedule

Records Storage Accountability and Maintenance

Other than emails held in inboxes and sent boxes, all electronic records must be maintained in a storage format that properly identifies the record. Records must be stored and maintained in a designated centralized server location.

Authorizing Managers and Policy Owner

KR has established a Records Retention and Management Committee ("Authorizing Managers"), which consists of a multi-departmental team and is chaired by the Policy Owner. The Policy Owner is responsible for implementing and maintaining the records retention procedures and guidelines set forth in this Policy, including monitoring and auditing compliance with the Policy, as well as interpreting and supplementing the Policy as necessary. This policy is reviewed at least once every year to evaluate training and compliance with the Policy as well as any proposed amendments thereto.

Education and Awareness

In order for this Policy to be effective, employees must understand and consistently implement the practices set forth herein. To that end, training is an integral part of this Policy. The RRMC may conduct periodic training to refresh employees on their responsibilities and requirements under this Policy and to address questions or clarify understanding regarding implementation of this Policy.

Review and Audit

An annual records review must be performed by all employees who maintain company records. The RRMC and each department may coordinate an annual "Spring Cleaning" program to ensure proper records management. The program highlights the benefits of efficient records management and provides time for all employees to review their company records.

All records, both electronic and hardcopy, that have an expired retention period must be disposed of properly. It is each employee's responsibility to ensure that special records are not destroyed prematurely. Special attention should be given to special records held for tax or legal purposes.

In addition to periodic reviews, audits shall be performed, and results reported as requested by the RRMC.

Procedure For Amending Records Retention Schedule

This Policy supersedes any and all prior records management policies. KR reserves the right to amend, modify or discontinue this Policy at any time, for any reason.

If you have any questions about this Policy, please contact the Policy Owner or Records Administrator (Adam Daube).

- The default retention period for any record that does not fall within a classification below is a maximum of two (2) years.
- Actual destruction of records on the schedule should occur after 6 or 8 months of the end of the fiscal year in which the record is to be destroyed.

Roles & Responsibilities

The Roles and Responsibilities section below provides summary-level guidance and supplemented via process and procedures documentation as necessary.

Role	Responsibilities (including, but not limited to)
Record "Owner" & Records users (employees, contractors)	Company management is responsible and accountable for managing and implementing this Policy. Unless another individual has been specifically designated, the head of each department is responsible for managing the Records

	maintained by his/her department in accordance with this Policy. The Department Head may delegate such responsibility to another person, and such individuals shall be identified in writing to the Records Administrator.
Chief Operations Officer (COO) Chief Risk Officer (CRO)	Company management is responsible and accountable for managing and implementing this Policy. Unless another individual has been specifically designated, the head of each department is responsible for managing the Records maintained by his/her department in accordance with this Policy. The Department Head may delegate such responsibility to another person, and such individuals shall be identified in writing to the Records Administrator.
Systems of Record ("SOR") & Workflow Solution (ambiguous)	The Human Resources Department is responsible for providing every new employee with a copy of the Policy at the time of employment. Part of each employee's job is to implement this Policy.

Compliance / Exceptions

All KR employees, contractors, and applicable third parties are required to adhere to established policies and standards. Violation of KR policies and/or standards may result in disciplinary action, up to and including termination. Any suspected violation should be reported to the policy owner, Chief Operations Officer or Chief Risk Officer.

If compliance with any aspects of this policy is not feasible or technically possible, or an exception is necessary to support a business objective, individuals must request an exception through the policy owner and authorizing managers.

Record Retention Program Tracking Issues

Year	Comments
2010	Paper Records destruction Iron Mountain and storage records
2011	Electronic Records have not been destroyed because: E&T and FAVS records are not segregated from the network. Current project in place to segregate files. Destruction is expected to occur during 2012

	Emails in the process of moving from archived *.pst to the McAfee tool archived tool. Expected conversion to be completed by the end of May 2012
2020	Destroyed Page & Associates boxes that had been scanned. Remaining boxes will be scanned and placed in client # 01904

Records Retention Schedule

Kaufman, Rossin & Co. Clients Records

Classification/Record Name	Retention Period
Audit (Assurance)	
Financial statement audit, compilation, agreed upon procedures and reviews work paper files	8 years after lock-down of file ¹
Quarterly financial reviews (10Q)	8 years after lock-down of file
Substantive communications with client, authorities, or regulators	8 years ²
Client documents not used to support attest engagements	Return to client or destroy after audit is completed
Drafts	Destroy immediately
Tax	
Tax returns	8 years
Tax returns workpaper files	8 years
- Permanent basis items - Current clients - Former clients	Permanent 8 years
Tax advice, opinions or recommendations	8 years
